About Science Exhibition

Science is inexplicably linked with our lives and helps us to understand the world around us better. It, thus, becomes imperative to encourage our students to think, learn, solve problems and make informed decisions. The organization of the Science Exhibition is one such initiative. The activity aims to provide a platform for students to demonstrate such learnings that encourage the construction of knowledge by connecting new ideas to existing concepts as well as enriching one's understanding of other's experiences and perspectives.

Why should students participate?

Participation in the Science exhibition is an opportunity to explore real-world challenges, learn more about science and technology, and apply scientific ideas to solve them. It would encourage you to acquire and use the methods and processes of science, such as observation, questioning, planning investigations, hypothesizing, collecting, analyzing, and interpreting data, etc. As you interact with co-participants, mentors, and leading experts in the field of science, you will also get an opportunity to learn about different facets of science.

The objectives of the CBSE Science Exhibition are to

provide scope for inventive, critical thinking and problem solving

apply mathematics and information technology to visualise and solve real-world problems

provide a forum for learners to pursue natural curiosity, and innovative ideas

create awareness about environmental issues and concerns

encourage learners to foresee the future of the planet and help them become sensitive and responsible human beings.

Steps for Participation

Step 1 – Registration | Step 2 – Project Development & Submission | Step 3 – Evaluation

Step 1.1 | Step 1.2 | Step 1.3

Register
Online filling up of participants details

Payment
Online payment of registration fee
